

What is GlassOuse?

GlassOuse is an assistive device designed to help people who can't use technology due to limited abilities and give them more control of their computers, phones and smart TVs.

Designed for daily use, GlassOuse is worn like a pair of glasses and connects to mobile phones, computers, tablets and Smart TVs via Bluetooth to revolutionize the technology use for those with restricted mobility.

Connect Technology Hands Free!

Choose your G-Switch Control and Connect to Tech Gadgets via Bluetooth.

G-Switch Series - GlassOuse V1.2 can be combined with highly adaptable switch controls of G-Switch Series for different kind of needs. Clicks can be done via simple bites, puffs, by fingers or foot. Or you can use GlassOuse V1.2 via Dwell software directly.

Wide Compatibility - GlassOuse V1.2 is compatible with Windows, macOS, Linux, Chrome OS and Linux. The device connects to computers, mobile phones, tablets and smart TVs via Bluetooth easily.

No complex set up - only an initial 2 minutes calibration for maximum accuracy.

Easy Control - GlassOuse V1.2 is worn like regular glasses and it is super lightweight. To move the cursor, move your head and to do clicks, use your switch control from G-Switch Series or use Dwell software settings directly.

Adjustable - Customize your GlassOuse V1.2 according to your needs. Adjustable switch controls gives you the freedom to find the most suitable click options. Connect your choice of switch control through 3.5mm mono jack plugin, and choose the sensitivity to have the best experience.
